TE80SB

Advanced power stealing circuit requires no batteries to be replaced... No nuisance calls or shutdowns.

True HVAC professionals always demand the best. Our superior "Professional Series" line of thermostats offers a "state of the art" microprocessor integrated chip, tough molded ergonomic case, and a highly visible and easy to read digital display. All "Professional Series" thermostats are designed with ease of installation, pinpoint accuracy, and a versatility not found in competitive products. Reliability and long term durability are guaranteed and backed up with many years of thermostat design experience.

"All our products are built with the 'Professional Contractor' in mind."
